# School Safety, Security, Emergency Preparedness & Climate-Do your approaches have Fidelity?

## A Dynamic Presentation Featuring Michael Dorn of Safe Havens International.

School officials typically expend considerable time, energy and fiscal resources on creating safe school climates. However, these commitments do not always correlate to effective and reliable approaches.

This dynamic presentation will emphasize how school officials can identify, measure and reduce the distance between written policies and plans and actual preventive practices and life-saving preparedness capabilities.

Based on **whole child** and **whole staff** approaches combined with dozens of video and audio scenarios, this unforgettable experience will provide tangible and practical approaches based on facts rather than fear including:

- ❖ How to achieve fidelity in school safety, security, emergency preparedness and school climate strategies.
- ❖ How gaps in fidelity can negatively impact learning processes.
- ❖ Fact versus fear - debunking common and damaging myths about school safety.
- ❖ Pattern matching and recognition.
- ❖ Simple yet powerful student supervision concepts.
- ❖ Emergency preparedness for persons with special needs.
- ❖ Improving school climate and reducing the negative impact of physical security measures.
- ❖ Case study - Weakfish - Bullying Through the Eyes of a Child.
